

Mayank Kumar

AI Full-Stack Developer | Software Engineer

Mayank701130@gmail.com | 7011300316 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#) | India, Delhi

Summary

Full-Stack Web Developer with hands-on experience building scalable applications using React.js, Node.js, Express.js, TypeScript, and SQL/NoSQL databases. Skilled in REST APIs, authentication, database optimization, Redis, Docker, AWS, CI/CD, and scalable backend architecture. Hands-on knowledge of LLMs, LangChain, LangGraph, RAG, embeddings, and vector databases for AI-powered applications.

Experience

Software Development Intern — ScaleSage Solutions LLP, Gurgaon

- Built a production-ready resume builder platform with **100+ templates** across single-column, dual-column, and modern layouts, giving users control over fonts, sizing, and spacing.
 - Engineered a dynamic multi-page pagination engine and Puppeteer-based PDF export pipeline producing pixel-perfect output matching the live preview, eliminating layout drift.
 - Owned end-to-end delivery of a document parsing pipeline (PDF/DOCX → structured JSON) with dnd-kit drag-and-drop reordering and centralized Redux Toolkit state, reducing manual data entry by ~60% for active users.
 - Developed and debugged backend REST APIs, performing root-cause analysis and query optimization to improve reliability and response times.
 - Implemented Google and LinkedIn OAuth 2.0 login with JWT session handling, and built an admin panel to track user activity across **10+ tracked events** (logins, exports, template usage).
-

Project

Resume Builder | MERN Stack, Prisma (MySQL), JWT, OAuth 2.0, Razorpay API

[Link](#)

- Built a full-stack, multi-template resume platform (React.js, Redux Toolkit, Node.js, Express.js, Prisma ORM) with live preview and PDF export.
- Implemented drag-and-drop resume editing using dnd-kit with real-time state sync via Redux Toolkit.
- Integrated Razorpay payment gateway (order creation, checkout, webhook-based signature verification) with edge-case handling for duplicate, failed, and partial-refund transactions.

Product Catalog with Cursor Pagination | Node.js, TypeScript, PostgreSQL (Supabase), React

- Engineered a scalable product browsing REST API supporting 200K+ records using efficient cursor-based pagination.
- Implemented stable pagination using (created_at, id) tuple ordering to prevent duplicate and missing records across pages.
- Applied Repository-Service-Controller architecture with Zod schema validation, centralized configuration, and production-ready error handling.
- Optimized PostgreSQL queries with composite indexing and parameterized SQL for fast, secure data retrieval and filtering.

Learning Management System | MERN Stack, Cloudinary, Role-Based Access

- Built a full-stack LMS where teachers upload courses (video via Cloudinary) and students browse and enroll.
 - Implemented role-based access control separating teacher and student permissions across course and enrollment routes.
-

Technical Skills

Languages: C++, JavaScript (ES6+), TypeScript, Java, Python

Frontend: React.js, Redux Toolkit, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, JWT, OAuth 2.0, Webhooks, MVC, Microservices

Databases: MongoDB, MySQL, PostgreSQL, Redis, Prisma ORM, Mongoose

AI / GenAI: LLMs, LangChain, LangGraph, RAG, Embeddings, Vector Databases, Semantic Search

System Design: Scalability, Load Balancing, Nginx, Database Replication, Database Sharding

DevOps & Cloud: Docker, Docker Compose, AWS (EC2, S3), Git, GitHub, GitHub Actions, CI/CD

Tools: Postman, n8n, Cursor, GitHub Copilot, Claude Code

Education

B.Tech — Computer Science & Engineering, ABES Institute of Technology, Ghaziabad (AKTU) | 2021 – 2025

CERTIFICATIONS

- Java with DSA & System Design** — Core Java, OOP, DSA, problem-solving, scalable system design.
- Full Stack Development** — React, Node.js, Express.js, MongoDB.
