PROFESSIONAL SUMMARY

Full-Stack Developer specializing in scalable MERN applications, dynamic rendering systems, and performance optimization. Experienced in building production-grade platforms including resume builders, AI-powered applications, and admin dashboards using React, Node.js, Prisma, and cloud deployment workflows. Strong foundation in DSA, REST APIs, system design, and scalable frontend architecture.

EXPERIENCE

Software Development Intern — ScaleSage Solutions LLP, Gurgaon

Nov 2025 – Mar 2026

- **Engineered** a dynamic multi-page pagination engine and Puppeteer-based PDF export pipeline, reducing export errors by ~40%.
- **Built** a resume parsing pipeline (PDF/DOCX → structured JSON) with drag-and-drop section reordering using centralized Redux state, cutting manual data entry by ~60%
- **Developed** an Admin Dashboard with real-time analytics and activity tracking across 5,000+ user interactions, enabling data-driven product decisions
- **Optimized** 10+ backend REST APIs with Node.js, Express, and Prisma ORM (MySQL), reducing average API response time by 35%
- **Contributed** to full-stack feature development across 5+ production modules using React, Redux Toolkit, Node.js, Express.js, and Prisma ORM

PROJECTS

Resume Builder | MERN + Prisma (MySQL) + AI | [Live Demo](#)

- **Built** a scalable, multi-template resume platform (React, Redux Toolkit, Node.js, Express, Prisma ORM) supporting dynamic multi-page layouts with live preview
- **Designed** a pagination and template-rendering engine that auto-adjusts content flow across pages, reducing layout overflow errors by ~50%
- **Implemented** drag-and-drop section management with dnd-kit and real-time preview synchronization, improving UX for 200+ beta users
- **Secured** application with JWT authentication and Google OAuth 2.0, achieving sub-100ms token verification response times
- **Integrated** Puppeteer-based PDF export and Cloudinary-backed DOCX pipeline, processing 500+ document exports per month

AI-Powered LMS | MERN Stack

- Built a full-stack Learning Management System with role-based dashboards and secure authentication using OAuth 2.0, OTP, and JWT.
- Integrated Razorpay payment gateway with server-side verification and implemented edge-case handling for duplicate, failed, and partial refund transactions, reducing payment failures by ~30%.

TECHNICAL SKILLS

Languages: C++, JavaScript (ES6+), TypeScript, Java, Python

Frontend: React.js, Redux Toolkit, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, dnd-kit

Backend: Node.js, Express.js, REST APIs, JWT Authentication, Google OAuth 2.0

Database & ORM: MongoDB, MySQL, Prisma ORM, Mongoose

Tools & Platforms: Git, GitHub, Postman, Puppeteer, AWS, Render, Netlify, Cloudinary

Concepts: DSA, System Design, MVC Architecture, State Management, Responsive Web Design

EDUCATION

B.Tech — Computer Science & Engineering

2021 – 2025

ABES Institute of Technology, Ghaziabad | Dr. A.P.J. Abdul Kalam Technical University (AKTU)

CERTIFICATIONS

Java with DSA & System Design — Learned Core Java, Object-Oriented Programming, Data Structures & Algorithms, problem-solving techniques, and fundamentals of scalable system design.

Full Stack Development: React, Node.js, Express.js, MongoDB.
